We provide brushes and pad holders that will give you the best possible performance between machine and floor. Following are descriptions of the materials and their applications.

Union Mix:	Medium grade natural fibers for polishing finished floors with standard-speed equipment. Recommended for use in place of white pads.
ProLite:	Bristles are made from light-duty polypropylene for general scrubbing when you do not want to scratch or remove finish from the floor. Recommended for use in place of red pads.
Prolene:	Polypropylene material for medium-duty scrubbing on concrete, terrazzo and vinyl floor tile. Recommended for use in place of green or blue pads.
Magna Grit:	For extreme heavy-duty scrubbing or stripping of floors. This brush has extra large diameter silicon carbide grit impregnated synthetic bristles. Recommended for use in place of black pads.
Dyna Grit:	For aggressive, heavy-duty scrubbing or stripping of floors. Recommended for use in place of brown pads.
MidLite Grit:	For general purpose scrubbing of sealed or unsealed concrete, stone, terrazzo, quarry tile and other resilient hard floor surfaces. Recommended for use in place of green or blue pads.
MidGrit:	For general purpose scrubbing when you need a lighter action for sealed or unsealed concrete, stone, terrazzo, quarry tile and other resilient hard floor surfaces. Recommended for use in place of green or blue pads.
AgLite Grit:	For light scrubbing when used wet; buffing or polishing when used dry on urethane coated, sealed concrete or other resilient hard surface floors. Recommended for use in place of red or white pads.
Short Trim	
Pad Holder:	Made with a structural foam block and center ring for correct pad centering. It has a "shower feed" design for getting solution to the floor.

We provide brushes and pad holders that will give you the best possible performance between machine and floor. Following are descriptions of the materials and their applications.

- 46 Grit Brush: Most aggressive grit brush. Used primarily to clean heavy buildup on concrete floors in factories, or for heavy stripping of finish.
- 80 Grit Brush: Medium aggressive grit brush. Good all-around brush for medium to heavy buildup removal. Can also be used for general stripping operations.
- 180 Grit Brush: Least aggressive grit brush. Used for daily cleaning of hard-finished floors.
- Polypropylene Brush: Standard equipment brush. Low cost, yet effective in cleaning many common floor surfaces.
- Stiff Nylon Brush: Cleaning action similar to polypropylene. More durable and wear-resistant than polypropylene.
- Soft Nylon Brush: Least aggressive brush available. Used on soft-finish floors where a more aggressive brush would leave scratch marks, or in applications requiring very light cleaning.

INSTALLATION INSTRUCTIONS

WARNING!

DISCONNECT BATTERIES BEFORE SERVICING.

SQUEEGEE LIFT ACTUATOR MOTOR REMOVAL

- 1 Lower the squeegee tool to the floor and then disconnect the battery pack by pushing in the emergency disconnect lever. This procedure is done to prevent the squeegee mount from automatically raising when the key is turned off.
- 2 Drain the recovery tank using the recovery tank drain hose.
- 3 Disconnect the squeegee hose from the squeegee tool and remove the tool from its mount.
- 4 Open the hinged recovery tank cover and grip the top inside edge of the tank then pull straight up to separate it from the solution tank/seat platform. Then guide the tank off the rear of the machine to the floor. **Important Service Note:** Support the bottom of the tank on its left corner to prevent crushing of the squeegee hose. Don't pull the tank immediately away from the machine the vacuum motor wiring harness located on the lower left front corner must be disconnected to complete the separation.
