We provide brushes and pad holders that will give you the best possible performance between machine and floor. Following are descriptions of the materials and their applications.

- ProLite:** Bristles are made from light-duty polypropylene for general scrubbing when you do not want to scratch or remove finish from the floor. Recommended for use in place of red pads.
- Prolene:** Polypropylene material for medium-duty scrubbing on concrete, terrazzo and vinyl floor tile. Recommended for use in place of green or blue pads.
- Union Mix:** Medium grade natural fibers for polishing finished floors with standard-speed equipment. Recommended for use in place of white pads.
- AgLite Grit 500:** For light scrubbing when used wet; buffing or polishing when used dry on urethane coated, sealed concrete or other resilient hard surface floors. Recommended for use in place of red or white pads.
- MidGrit 240:** For general purpose scrubbing when you need a lighter action for sealed or unsealed concrete, stone, terrazzo, quarry tile and other resilient hard floor surfaces. Recommended for use in place of green or blue pads.
- MidLite Grit 180:** For general purpose scrubbing of sealed or unsealed concrete, stone, terrazzo, quarry tile and other resilient hard floor surfaces. Recommended for use in place of green or blue pads.
- Dyna Grit 80:** For aggressive, heavy-duty scrubbing or stripping of floors. Recommended for use in place of brown pads.
- Magna Grit 46:** For extreme heavy-duty scrubbing or stripping of floors. This brush has extra large diameter silicon carbide grit impregnated synthetic bristles. Recommended for use in place of black pads.
- Short Trim**
- Pad Holder:** Made with a structural foam block and center ring for correct pad centering. It has a "shower feed" design for getting solution to the floor.

Pos. 1-10: BA 756 BRUSHES

Pos. 20-29 BA 856 BRUSHES

We provide brushes and pad holders that will give you the best possible performance between machine and floor. Following are descriptions of the materials and their applications.

Soft Nylon: Least aggressive brush available. Used on soft-finish floors where a more aggressive brush would leave scratch marks, or in applications requiring very light cleaning.

Stiff Nylon: Cleaning action similar to polypropylene. More durable and wear-resistant than polypropylene.

Prolene: Low cost, yet effective in cleaning many common floor surfaces.

MidLite Grit 180: Least aggressive grit brush. Used for daily cleaning of hard-finished floors.

Dyna Grit 80: Medium aggressive grit brush. Good all-around brush for medium to heavy buildup removal. Can also be used for general stripping operations.

Magna Grit 46: Most aggressive grit brush. Used primarily to clean heavy buildup on concrete floors in factories, or for heavy stripping of finish.

BA 756 BRUSHES

56412191 - Soft Nylon

56412192 - Hard Nylon

56412046 - Prolene

56412193 - MidLite Grit 180

56412194 - Dyna Grit 80

56412195 - Magna Grit 46

This exploded view diagram illustrates the assembly of a laser projector. The components are numbered as follows:

- 1**: Two screws used for mounting the base plate.
- 2**: A small pin or spacer.
- 3**: A long screw passing through the base plate and the lens housing.
- 4**: A washer or spacer for the lens housing.
- 5**: A screw for the lens housing.
- 6**: A small pin or spacer.
- 7**: A laser diode module.
- 8**: A lens or filter.
- 9**: A lens or filter.
- 10**: A mounting plate or bracket.
- 11**: The main base plate.
- 12**: A screw for the lens housing.
- 13**: A warning label with the text: "DANGER! DO NOT STARE INTO LASER. CLASS 1 LASER PRODUCT. SEE PAGE 4, 2007 AND 2008/05/08".
- 14**: A screw for the lens housing.
- 15**: A lens or filter.
- 16**: A small pin or spacer.
