

# WATER JETTING GUNS

## DUMP & DRY SHUT

### 10.000 - 15 - 20.000 PSI

#### Dump:

A dump gun close of the un-pressurized dump port when triggered and releases the flow when the trigger handle is released. The gun works without an un-loader or relief-valve.

#### Dry Shut:

A dry shut gun opens for the water flow when triggered and shuts of when the trigger handle is released. The gun works together with an un-loader or relief-valve.
